EXPERIENCE

Software Engineering Intern

Content Turbine (info@contentturbine.com)

Aug 2022 - Oct 2022

Ontario, Canada

- Developed the frontend for the ContentTurbine AI platform using React.js
- Created a rich text editor using the Tiptap framework with comments feature.
- Updated backend REST API built using Flask (python)
- Implemented a tour for users on [Content Turbine](#) platform using Shepherd.js.

Fullstack Developer Intern

TGH Tech (hello@tghtech.com)

May 2022 - July 2022

Kochi, Kerala

- Developed a REST API for [Boring Bots](#), a web platform that helps businesses and professionals automate mundane tasks using Node.js, in a team of two.
- Updated UI and added web push notifications using Firebase Cloud Messaging to [VCTech](#), a SaaS platform for construction site management, built using the React library.
- Built the first phase of [The Social Town \(TST\)](#), a virtual platform for community builders and social change-makers. Led and managed three other developers, built the REST API for the backend using express.js and MongoDB and used AWS Cognito to add multi-role authentication to the same.

SKILLS

Languages: Javascript, Python, C++

Framework/library: React.js, Next.js, Express.js
